

Master Bath Collection

See **Project Portfolio** and **Design Portfolio** to see more drawings, models and pictures of our Master Bathrooms

Bathrooms are another signature feature of our homes. The Master Bath of your project is another place where costs can mount. It is usually one of the most important rooms in the house for our clients, making it a main focus in the design of the project. Our proven system will track all of the parts and pieces to guide you through this very complex part of the project.

First, we need to understand all the specifications prior to the rough plumbing stage. This usually happens right after the framing, therefore the design is one of the first steps that will need to be decided. Second, we will need to make the tile and stone selections. Third, the cabinets and millwork, and last, the lighting. We will meet you at the proper showrooms and guide you every step of the way to answer any questions, determine the time necessary for the schedule, work out the budget, make recommendations, and design all the fine details with you. As we are selecting and designing your bathroom, we will use our CADD system with its 3D technology. We will apply the selections to the design within our drawings to create a superior Master Bath. Once the design is complete, we will draft the detailed drawings that are necessary to finalize the budget, fabricate all the details, and guide all of the subcontractors involved, making sure your vision is realized. For an example of these drawings, you can go to the project portfolio section of our website, and if there is a button "drawing set available" you can view the full size precision drawings online. There are also drawings available in the slide shows of the portfolio sets.

Below are examples of technical drawings used for ordering, fabrication, and installation. A 3D model can be developed to provide a better understanding of the space. The following pages will show several of our completed Master Bathrooms. This will give you the opportunity to preview our Master Bathrooms prior to looking through our web portfolios.

Above is an example of a technical drawing of a floor plan and elevation for the **Italian Contemporary** on page 3.

Above are examples showing the precision 3D Modeling capabilities for the **Italian Contemporary** on page 3.

The gorgeous wall-mounted faucet projects from the stainless steel that wraps around the air tub. The vanity features metallic vessel sinks inset into the granite counter top with Euro style Jado faucets, and Italian Biazza glass mosaic tile backsplash outlined with a 1" square stainless tube. The custom stainless steel light seems to float away from the wall, creating a truly splendid effect. A sandblasted glass wall separates the water closet and shower, producing a translucent and clean result that gives the bathroom an open feeling.

Structurally Sleek

See *Project Portfolio* Tudor or
Design Portfolio Master Baths - Structurly Sleek for more pictures

This open vanity features a solid square framed granite counter with an inlay of stainless steel that floats above the three drawer wall mounted cabinets. The cherry wood frame above attaches the bath bar wall sconces and towel rings, with a mirror floating in between with custom stainless corners. All of this is bound together by custom welded stainless steel hardware. The Durango travertine floor tile flows into the tub and shower area broken by a wave of glass blocks that creates the shower partition. The tub deck showcases a fabulous blend of mosaics, mixed with a brown translucent backsplash. The tub and vanity backsplashes are finished with a wave glass liner that was the inspiration for the shapes and flow of the bathroom.

Italian Contemporary

This stunning Master Bath blends elegance with beauty. With Porto Beige Limestone floor tile, the Antique Brown granite counters float over a skirt, as this same detail visually joins the two vanities as they flow into the tub platform edge. The Fabritec espresso maple cabinets are wall mounted with an arched stainless steel toe kick under each sink, and a tapered mirror framed with a smooth glass tile down to a soldier course in the splash. The spacious shower has four body sprays, a hand shower, a center rain head from the ceiling, two benches made of solid granite, and an illuminated deep niche made with a pattern of glass tile. The Zaneen Twister sconces are integrated into the mirror frame as the corner pendants that hover in mid air add an artistic curve of balance, while the floor LED uplights in front of the tub create a glowing effect.

South African
 See *Project Portfolio* New Tudor or
Design Portfolio Master Baths - South African for more pictures

The shower sits in the center of the space with clear glass so you can see through the shower into the tub area. To the left of the tub sits the water closet, which is enclosed in sandblasted glass with a European glass door for privacy. The 12 foot long vanity has a custom glass and tile valance above with built-in lighting. There is a custom mirror with a combination of glass tile and rectangular shaped olive green limestone, as well as 3 separate built-in mirrors. The cabinets are South African wenge wood with a solid Antique Brown granite counter. The shower is enclosed on three sides with glass and has a European style glass door. The tub is an air tub with a solid granite shelf on three sides, and an intricate tile design of sonoma glass mosaic inside an olive green limestone. There is a solid granite bench that extends from the tub, piercing through the glass wall into the shower area.

New York Loft

 for more pictures

The bamboo wood, custom vanity has a tapered upright that pierces through the counter and supports three shelves, perfect for storing products for easy access. The steel I beam toe kick continues the theme from the rest of the loft, and the 1" stainless steel tubes frame the mirror that flows into the wainscot of Italian Biazza mosaic tile stripes and stainless steel panels. The glass vessel sink is complimented by the designer Grohe faucet, along with two square pieces of stainless inset into the wood counter. Opposite the vanity there is a sister open shelf unit with an alternating pattern of shelves notched into the upright. The large shower has a rain head, two body sprays, a hand shower, a natural concrete shower pan, a drip pan, and a heat lamp with towel hooks ready for drying.

Urban International

See *Project Portfolio* International or
Design Portfolio Master Baths - Urban International for more pictures

The custom wood, wall mounted vanity has a solid limestone counter that flows into the brick pattern tile wall, which wraps into the shower and tub deck. There are large round mirrors above the vanity, with plain fluorescent lights standing vertically to each side, and a modern chrome faucet standing stout over the large under mount sinks. The darker herringbone pattern floor is of a contrasting color and has a built in heating system to warm your bare feet in those cold winter months. The open shower has a rain head that curves up and around to the center, with a hand shower and a built in bench for seating.

French Country

See **Featured Project** French Country or
Design Portfolio Master Baths - French Country for more pictures

The mix of different sizes of travertine tiles adds texture as they blend perfectly into this traditional style, modern convenience bathroom. The elegant cherry wood vanity has two sinks with oil rubbed bronze faucets, and the makeup table in the center sits beneath a large window. The wood framed mirrors, with sconces above, merge nicely into the backsplach of tumbled marble with bronze metal medallions. The tub deck has a great bench seat off to the side beneath a large window. The masterful shower opens into the vaulted ceiling, providing a sense of volume. It is separated by a curved glass block wall, with two benches, two decorative arched top niches, a rain head, body sprays, and a hand shower.

Modern Mediterranean

See **Project Portfolio** Mediterranean or
Design Portfolio Master Baths - Modern Mediterranean for more pictures

This bathroom has a separate wet area that houses the tub and shower. The tumbled marble tile floor curves around to the glass block walls, framed in travertine, as it flows nicely into the curved tub deck with a glass mosaic backsplash framed in cherry. The two windows, one of glass block, let in an abundance of light. This very custom vanity has European wall mounted cabinets with cherry wood doors, mixed light and dark, and designer glass inserts. There is a slight arch accent put into the shelf below and the counter top above. To finish we have a rectangular curved corner mirror, flashy glass mosaic tile backsplash, and Grohe wall mounted faucets for the stainless steel vessel sinks.

Japanese Inspired

See [Project Portfolio California Tudor](#) or [Design Portfolio Master Baths - Japanese Inspired](#) for more pictures

This unique vanity, with mocha cherry wood cabinets in opposing L shapes, has a concrete counter edged with stainless steel, that flows flawlessly into the integrated sinks, two decorative legs that angle to the floor, and a stainless steel pole accent that pierces the counter. The travertine backsplash matches the floor and shower tile edged in cherry, while three wood panel's project from the wall layering to the mirrors, finished by a triangular valance trimmed in stainless. The free standing air tub sits on a concrete triangular base tucked into the bay with two windows and a glass block center. The basket weave patterned tile adds continuity as it ties together the liner behind the tub, the shower niche, sand the shower floor. The vertical smoked glass panels separate the dripping area from the bath with a tower of stainless steel framed glass shelves for storing towels right outside the drip area.

French Eclectic

See [Project Portfolio French Tudor](#) or [Design Portfolio Master Baths - French Eclectic](#) for more pictures

The wall hung vanity is natural cherry, with patterned glass door inserts, and a dense travertine tile counter. The wall mounted Grohe faucets work well with the anodized metal sinks that match the slate backsplash, mixing in the travertine creating a corner diamond to frame the mirror. The center cabinet divides the space providing extra storage and is capped by a glass block valance. The open shower area features arched niches and a bench accented with a mosaic tile. The corner tub intersects the curved glass block shower wall as large glass block windows let in lots of natural light.

Deco Modern

See [Project Portfolio](#) Deco Tudor

[Design Portfolio](#) Master Baths - Deco Modern for more pictures

The field tile consists of large pieces of olive green limestone mixed with mosaic tile of the same stone, which creates this pattern of rectangles outlined by the Sonoma glass mosaics, accented by the step in the curved tub deck. The custom vanity has a combination of drawers and open shelves, a solid granite top, a blend of the Sonoma glass and limestone mosaics for the backsplash, as mahogany colored cherry wood transitions to the mirror. The large steam shower follows the same combination of tile contoured to the vaulted ceiling, and has a stained concrete shower pan, rain head, body sprays and hand shower. The combination of clear and decorative glass enclosure, European door and transom is a magnificent final touch!

European Revival

See [Project Portfolio](#) Tudor Revival or

[Design Portfolio](#) Master Baths - European Revival for more pictures

Texture is created by the travertine tile mixed of different sizes and capped by a brushed, stainless steel tube liner throughout. Notice how the non-conventional tub deck's base is recessed, crossing above the shower curb while creating a sophisticated, geometric look. The open shower's glass block walls have a tile base, in unity with the tub deck. Since the two walls offset each other to keep the water in, you must walk around them to enter. The natural cherry wood vanity has an arched stainless toe kick that compliments the arched soffit above, and a mosaic travertine backsplash that angles up to the tiered corner stainless steel shelves is finished by a stainless steel framed mirror.

Colorado Classic

See [Design Portfolio Master Baths - Colorado Classic](#) for more pictures

This large vanity has plenty of drawers for storage, two medicine cabinets, and a Costa Esmeraldo granite counter top with an illuminated arched soffit above. The granite continues to the tub deck as it softly curves around, piercing through the shower's glass enclosure to become a bench. The front of the tub deck is cut into soldiers, flowing nicely into the large shower pan and adding texture through the use of the same stone. Retaining the original oak wood floor while adding the new cherry wood cabinets adds modern convenience along with that Colorado Classic look.

Simply Urban

See [Project Portfolio Poptop or Design Portfolio Master Baths - Simply Urban](#) for more pictures

This urban style bathroom has everything necessary for a Master Bath at a great budget. The sinks have custom bamboo cabinets with alternating grain patterns and are across from each other, leaving plenty of space for two getting ready at the same time. The glass mosaic splash runs continuously from the vanity to the tub deck with a limestone liner on top. The soldier pattern of rectangular limestone mosaics wraps the curved tub deck, blending perfectly with the larger olive green limestone tiles that cover the floor and surround the shower. The large open shower is separated from the bath by glass panel, and features two custom stainless steel benches. One in the dripping area with a heat lamp above with hooks for towels, and one inside the wet area perfect for shaving.
